Review to the use of the devices

Since 2006, Tulenergo the branch of IDGC of Center and Volga region, PJSC, has been using devices PKV/M6, PKV/M7, MIKO-1 and PKR- 2M manufactured by SKB EP, LLC.

PKV/M7 and MIKO-1 have become irreplaceable assistants in diagnostic of high-voltage switches the following types: VMG-133, VMP-10, VK-10, VBM-10-20, S-35, VT-35, VGBE- 35, MKP-110, VGT-110. PKR-2M is used to accurately and quickly assess the state of the switching device of power transformers.

All devices are reliable, convenient and easy to use thanks to the clear interface and small dimensions.

We express our gratitude to SKB EP, LLC for the production of high-quality devices and also we recommend devices of the company to organizations involved in the installation, debugging, operation and repair of electrical equipment.
