Review of SKB EP, LLC instruments

Dear Olga Nikolaevna!

The electrotechnical laboratory of Solikamskaya CHP LLC in Solikamsk has the foollowing instruments in its technical base manufactured by SKB EP, LLC: a digital micrometer MIKO - 1, a control instrument for high-voltage circuit breakers PKV/M7.

With the help of MIKO - 1 micro-ohmmeter staff measures direct current of contact joints. The main advantages of this instrument are: compactness and low weight, ease of use and user-friendly interface, autonomy and mobility, which is very convenient when working away from power supply. A digital display allows you to reduce errors when taking readings. During operation period, the micro-ohmmeter showed itself as a reliable and convenient device. There were no failures in operation.

A high-voltage circuit breaker analyzer PKV/M7 is used for monitoring the condition and take readings of 6, 35, 110 kV high-voltage circuit breakers.

The main advantages of this instrument are: ease of operation and convenience, reliability, high measurement accuracy, small dimensions. The instruments are equipped with a set of high-quality measuring cables and clamps. During PKV/M7 operation, there were not any problems or malfunctions with the instrument.

We recommend instruments manufactured by SKB EP, LLC to other organizations for electrical equipment control and diagnostic.

We wish SKB EP, LLC employees successfully develop and implement modern control and diagnostic devices for electrical equipment.

Chief Engineer

V.P. Lapygin
