Review of Miko-7MA
instrument operation

Dear Olga Nikolaevna!

Currently Miko-7MA is operated in the electrotechnical laboratory of the Electrical Installation Directorate of CNGS Engineering, LLC.

Since February 2020 during Miko-7MA operation there has not revealed any shortcomings and failures.

When measuring direct current resistance of windings:

- in power and measuring transformers,
- in electric motors,

the instrument showed stability, ease of use and accuracy of results.

CNGS Engineering, LLC thanks SKB EP, LLC for the high-quality instrument and the interest shown in the operating experience and also hopes for production of new developments for power equipment diagnostic.

Director General

S.S. Alekseev
