Review to the devices

ATTN: Director General  
of SKB EP LLC  
Ekaterinina Olga Nikolaevna

Dear Olga Nikolaevna,

We have been using the devices MIKO-2.3 (2 pcs.), PKV/M7 (1 pc.) and MIKO-1 (1 pc.) in the Vakhsky district of Nizhnevartovsk electrical networks.

We have been working with your devices for more than 10 years on the following types of high-voltage switches: VGB-35 (6-110kV), S-35 (with the drives SHPE-12 and PP-67), VMT-110, VGT-110, transformers TM (6-10 kV), TMG (6-10kV), and various types of disconnectors with the voltage 6-220 kV.

All the devices are quite convenient to use.

With the help of your devices, we have detected a lot of equipment malfunctions.

The accuracy of the results compared to similar devices of other manufacturers is at a high level. I can sincerely recommend your devices to other organizations.

Chief Foreman of the Vakhsky District of  
Nizhnevartovsk electrical networks

T.N. Ratnikov
